

# POD GO

## FIRMWARE UPDATE INSTRUCTIONS

It's really easy to update the firmware in your POD® Go processor. Just follow these steps:

1. Download (from [line6.com/software](https://line6.com/software)) and install the newest version of the *POD Go Edit* software and connect POD Go.
2. Log into your Line 6 user account. *POD Go Edit* will tell you there's an update available.
3. Follow the prompts on both your computer screen and the POD Go unit.
