

# STAGESOURCE L3s

The World's Most Versatile Subwoofer System for Live Sound

- 1,200-watt, bi-amped, bass-reflex subwoofer system
- Smart Speaker Modes for live, punchy, extended or ultra-bass
- Multi-function, modular architecture for true scalability
- Digital Networking via L6 LINK™ for multi-speaker PA systems

StageSource™ L3s combines versatile design with Smart Speaker modes, automatic speaker configuration via L6 LINK digital networking and a tour-grade enclosure for the widest variety of live sound applications.

With a precision bass-reflex design, StageSource L3s delivers 1,200 watts of powerful, extended sub-bass and incredible fidelity. Based on an innovative new technology platform, StageSource L3s combines intelligent DSP and multi-function design to provide outstanding performance and easy system integration via L6 LINK digital networking.

Low-end clarity is crucial for powerful musical performances, but different scenarios can require different bass tunings to ensure the best results. Designed for the widest range of applications, StageSource L3s subwoofers feature Smart Speaker modes that allow you to tune the subwoofer output to deliver the perfect low-end performance at the touch of a button. Whether you need huge punchy kick and bass sounds for a live rhythm section, or deep, controlled sub-bass for DJ performances, Smart Speaker modes make setup simple and deliver stunning sound in every application.

# STAGESOURCE L3s

The World's Most Versatile Subwoofer System for Live Sound

## Features

### 1,200-watt bi-amped, bass-reflex subwoofer

Easily capable of delivering powerful low-end to large audiences, StageSource L3s features a dual 12-inch bass reflex configuration with 1,200 watts of power for maximum headroom and superb low-end definition.

### Smart Speaker modes

Low-end clarity is crucial for powerful musical performances, but different scenarios can require different bass tunings to ensure the best results. Designed for the widest range of applications, StageSource L3s subwoofers feature four Smart Speaker modes that allow you to tune the subwoofer output to deliver the perfect low-end performance at the touch of a button.

### Digital networking via L6 LINK

L6 LINK™ digital networking takes the complexities out of configuring a multi-speaker rig. In an L6 LINK network, StageSource L3s automatically detects other StageSource speakers and automatically configures its settings accordingly; crossovers and polarity are set, stereo signals are summed, through signals are passed, and more.

### Three threaded pole-mounts

For the most flexible deployment options, L3s offers a single top pole-mount and two additional side pole mounts. All pole mounts are threaded for solid alignment and operation.

### Dual-braced tour-grade plywood construction

StageSource L3s is ready for whatever the road can throw at it. The robust enclosure is constructed of dual-braced, heavy-duty plywood and a tour-grade steel grille with protective screen backing for maximum driver protection.

### Tilt-and-go portability and multiple handling points

StageSource L3s features rattle-free wheels and multiple handle points for "tilt-and-go" portability, making it easy to transport.

### Multi-function design and scalability

Multi-function design combined with powerful Smart Speaker modes and digital networking provides true scalability whether you're using the subwoofer with a single top or a large-format PA. Together with StageSource L3t and L3m loudspeaker systems, L3s subwoofers provide a variety of configurations to meet your live sound or installation needs.

### Digital networking via L6 LINK and the dream stage

Featuring system-aware components, self-configuration and more, StageScape M20d and StageSource loudspeakers form an intelligent live sound ecosystem.

## Specifications

Part Number	99-032-0305
UPC	614252025010
Case Pack	1
Case Pack Size	39.4" H x 29.2" W x 21.1" L
Display Box Size	39.4" H x 29.2" W x 21.1" L
Display Box Weight	100.3 lbs

Estimated FCS Date  
Spring 2012
